

IODINE WITH KELP

Iodine is an essential trace mineral that plays a critical role in thyroid function, metabolism, energy conversion, and overall cellular health. Since the early 1800s, iodine has been recognized for its direct effect on the thyroid gland, where it's required for the production of thyroid hormones that regulate growth, energy, and metabolism. Beyond its role in thyroid health, iodine also supports immune function and overall vitality.

Our Iodine with Kelp formula combines potassium iodide, a form of iodine easily utilized by the thyroid gland, with nutrient-rich kelp. Kelp is a brown seaweed naturally high in iodine and a variety of vitamins and minerals, including calcium, magnesium, potassium, niacin, riboflavin, and choline. Together, these ingredients provide comprehensive trace mineral support to encourage optimal thyroid and metabolic function.

SUPPLEMENT FACTS

Serving Size: 3 Capsules Servings Per Container: 40

| | Amount Per Serving | % Daily Value |
|---|--------------------|---------------|
| Kelp (<i>Laminaria japonica</i>) Extract Powder | 1,500mg | ** |

** Daily Value Not Established.

Other Ingredients: Gelatin (capsule)

SOURCED FROM IODINE-RICH SEA KELP

Each serving provides a blend of potassium iodide and kelp, supplying essential iodine alongside naturally occurring minerals.

Iodine has been shown in scientific studies to:

- Support thyroid hormone production
- Reduce the risk of goiters
- Support the immune system
- Support neurodevelopment in pregnancy
- Support cognitive function in children
- Serve as a disinfectant
- Provide protection from nuclear fallout

The human body is like a finely tuned Swiss watch, with each gear (organ system) affecting all the others. For more information or to get tested, contact a Wellness Way clinic. We'll help you understand how your body is currently functioning and the best ways to support it!
