

ASTRAGALUS

Astragalus contains a wide array of phytonutrients that include a unique group of saponins called Astragalosides. These compounds play a role in normal immune function.

Historically, Astragalus has been used to strengthen the immune system in cases ranging from common cold and upper respiratory distress to allergies and anemia. This herb can also be useful in supporting kidney function, blood sugar metabolism and gastrointestinal barrier function. Astragalus can be applied to the skin to increase blood flow to the area and support wound healing as well.

A few key components of Astragalus include triterpenoid saponins, isoflavonoids, flavonoids, polysaccharides, and trace elements which serve as a tonic to help:

- Restore and enhance the body's immune system

- Support healthy adrenal and digestive function
- Promote glucose homeostasis
- Maintain healthy cardiovascular function
- Buffer the effect of stress
- Promote a healthy physical, mental, and emotional response to everyday stressors
- Promote the body's normal resistance function

Manufactured in a GMP certified facility.
Manufactured in the USA. Certified Kosher.
