

CALCIUM D-GLUCARATE

This product supplies a supplemental form of D-glucaric acid, a natural substance found in many fruits and vegetables that supports the body's ability to detoxify hormones and toxic compounds through a process called glucuronidation.

Some of the actions noted for Calcium D-Glucarate include:

- During glucuronidation, the compound glucuronic acid attaches to toxic chemicals including various carcinogens or hormones such as estrogen in the liver forming a complex that can be excreted in the bile. However, an enzyme called beta-glucuronidase can break the glucuronic acid bond, causing the hormone or toxic chemical to be released. Instead of being excreted, the hormone or toxin may be reabsorbed into the body. Beta-glucuronidase enzymes are active throughout the body, especially in the liver, colon, lungs, skin, bladder, breast, and prostate.
- Studies show that D-glucaric acid works by inhibiting the beta-glucuronidase enzyme, thus helping to promote safe removal of potentially harmful substances or steroid hormones such as estrogen and exerting a vital protective role for the immune system.

- Foods high in glucaric acid include apples, brussel sprouts, broccoli, cabbage, and bean sprouts. Combining D-glucaric acid with calcium forms a stable D-glucarate compound.

This product contains the patented form of D-glucarate developed for use in dietary supplements.

This product can be used when additional support for detoxification mechanisms are warranted. No side effects have been reported with use of calcium D-glucarate. This product is free of the following common allergens: milk/casein, eggs, fish, shellfish, tree nuts, peanuts, wheat/gluten, corn, yeast, and soybeans. Contains no artificial colors, flavors, or preservatives.

This product was made in a GMP and ISO 9001:2008 registered facility.

SUPPLEMENT FACTS

Serving Size: 1 capsule
Servings Per Container: 90

	Amount Per Serving	% Daily Value
Calcium (as Calcium-D-Glucarate)	60mg	5%
Calcium-D-Glucarate	500mg	**

** Daily Value Not Established.

Other Ingredients: Gelatin (Capsule)
