

CAT'S CLAW

Cat's Claw (*Uncaria tomentosa*) is derived from a vine native to South and Central America. The bark of the woody vine has been used for centuries by people native to Peru and the Amazon rainforest area.

Cat's Claw may help relax the smooth muscles in the gastrointestinal tract and possesses many anti-inflammatory properties. The main constituents of Cat's Claw include oxindole alkaloids, indole alkaloidal glucosides, quinovic acid glycosides, tannins, polyphenols, catechins and beta sitosterol.

Cat's Claw may help alleviate discomfort; however, the benefits of Cat's Claw are different for each individual based upon their unique needs. Considered an immunomodulating adaptogen, the active compounds in Cat's Claw may:

- Support normal gastrointestinal function
- Lower inflammation
- Decrease muscle aches
- Support a healthy immune response

Manufactured in the USA.

Manufactured in a GMP certified facility.

Manufactured in the USA. Certified Kosher.

SUPPLEMENT FACTS

Serving Size: 2.5mL

Servings Per Container: Approx. 71
