

# CBD EXTRACT

The Wellness Way CBD extract is made from industrial grown hemp, with organic, high-end, non-gmo nutrients. It's a full spectrum product, oil is extracted from the leaves, flower, and buds of the hemp plant. This leaves all the compounds in-tact, along with terpenes, flavonoids, vitamin, minerals, fatty acids, and amino acids. Our CBD extract only has two ingredients. We want the best for our friends, families and patients. We use only full spectrum hemp extract and MCT coconut oil as a base.

We have a six step process to the cultivation and growth of our hemp, fully grown and all processes completed in the USA. We monitor this process from start to finish on the farm. See our manufacturing section for more information. Our farm has been growing since 2015, but don't be deceived. We have been at the cutting edge of the CBD industry since it's inception, over 20 years ago. The farm, based in Colorado, has developed their own hemp genetics with exceptional compound expressions, and terpene development which includes: CBD, CDBv, CBG, CBC, and many more.

We know where The Wellness Way products are, from seed to bottle. We have a batch number for each batch we produce which enables us to go back and reference for further quality checks. Quality is everything in the CBD Oil game and this is priority number one at The Wellness Way.

## Properties of CBD:

- **Non-psychoactive**
- **Antioxidant**
- **Immunomodulatory**
- **Anti-inflammatory**
- **Antiemetic**
- **Neuroprotective**
- **Anticonvulsant**
- **Anxiolytic (anti-anxiety)**

For best results, apply CBD Extract under the tongue and allow the product to absorb directly into the bloodstream for at least 60 seconds before swallowing. Dosage and frequency of application varies from person to person - average daily dosage for adults take 1/2 to one full dropper two to three times daily.

These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.

# CBD EXTRACT

## FAQs:

What is CBD oil? CBD oil, hemp extract, or cannabidiol, is a liquid that has been extracted from Hemp leaves and buds and processed into a supplement that can be ingested for various health benefits. CBD oils have many known properties and health benefits. CBD products that come from whole or full plant hemp extracts containing many naturally occurring cannabinoids, terpenes, and flavonoids and that are organically grown, have been found to be higher quality with great efficacy and effects.

## What is the difference between CBD Isolate and Full Spectrum?

**Full Spectrum** - This type of oil is extracted from industrial hemp and specifically leaves all properties and compounds in-tact. Additional properties such as flavonoids, terpenes, vitamins, minerals, phyto-cannabinoids, and many other healthy nutrients are left in the product, unfettered by human hands. This creates a powerful phenomena known as The Entourage Effect.

Full Spectrum CBD requires more time, effort, and expertise to properly extract while also preserving the integrity of the Hemp plant. This can be an excruciating process to learn and is a true art form when done properly. A true replicate of full spectrum cannot easily be manufactured. Full spectrum products have a natural, earthy taste, caused by the oil to function as intended by all the terpenes available.

**Isolate** - This compound is extracted and cooled until it forms crystals. These crystals are then processed into a fine powder. The result is a single molecule compound composed strictly of CBD. No other molecular compounds exist within this Isolate. Isolate products, having been stripped of all natural compounds, are flavorless, or some brands add flavor back in. \*\*Our Industry is flooded with Isolate products due to the apparent "ease" of creation.

Numerous cannabis compounds have medicinal attributes, but the therapeutic impact of whole plant cannabis is greater than the sum of its parts.

## Will this show up in a drug test?

The short answer is that this is not likely. The long answer is, because our full spectrum cannabinoid oils contains less than 0.3% THC, only very sensitive tests might pick up the traces of psychoactive agent present in the Oil. A more normal, less sensitive drug test will likely not

be able to show that you have taken CBD. Even in the event that it could, CBD Oil is a completely legal substance when it comes from legal sources like industrial hemp, which by definition must have less than 0.3% THC. Our products all come from completely legal industrial hemp.

**What is THC?** THC or tetrahydrocannabinol is the psychoactive agent present in marijuana that causes users to experience a "high". Most forms of marijuana will contain 10+% THC in order to produce psychoactive effects.

The Wellness Way CBD Oil contains less than 0.3% THC, and is produced from Industrial Hemp and not Marijuana. Therefore, The Wellness Way CBD Oil is completely legal.

## What is the percentage of CBD in your CBD Oil?

Our extracts contain about 70% CBD as a percentage of the total plant cannabinoids and terpenes. Our total cannabinoids are about 74% and our total terpenes are high at 26%. If we had less terpenes, like most of our competitors, our cannabinoid percentage would be even higher as a percentage of the total.

**How many servings per bottle?** All 30 ml bottles have a serving size of One Half-Dropper or .5ml. This means that if you take only One Half-Dropper of oil a day, you will have 60 Servings of oil or roughly 2 months of product. If you exceed this, then your CBD Oil will run out sooner.

**How much in in each bottle?** CBD Oil is most often organized into a milligram (MG) per milliliter (ML) comparison. You'll notice that each bottle will display a size (in our case it is 30ml) and a potency (we range from 1000mg to 3000mg). These numbers, especially the MG number, describe the potency of the product it is listed on. Higher numbers mean that there are more milligrams per equivalent dose, thus producing a potentially stronger effect.

## HIGH CBD EXTRACT

SUPPLEMENT FACTS		
Serving Size: 1 dropper (1mL)		
Servings Per Container: Approx. 30		
	Amount Per Serving	% Daily Value
CBD Oil	50mg	**
**Daily Value Not Established.		

Other Ingredients: Hemp extract, MCT Oil

## ULTRA CBD EXTRACT

SUPPLEMENT FACTS		
Serving Size: 1 dropper (1mL)		
Servings Per Container: Approx. 30		
	Amount Per Serving	% Daily Value
CBD Oil	100mg	**
**Daily Value Not Established.		

Other Ingredients: Hemp extract, MCT Oil
