

WELLNESS GREENS COMPLEX

This product provides a supplemental form of some of the most important vitamins, minerals and nutrients from some of the best organic greens sources available in a capsule form. It doesn't take much to realize how important greens are to a healthy lifestyle, but it is also easy to realize that most individuals do not consume the necessary amounts of greens in their daily diet. This is exactly why Wellness Greens Complex has become a staple to a healthy daily routine. Our unique combination of three organic greens ingredients allows for a variety of nutrient benefits that doesn't require you to eat them! In fact, the capsule version allows for improved digestion and absorption of the nutrients compared to the whole food alternative, allowing for maximum benefit from the many vitamin, minerals, and nutrients found in the ingredients.

The unique combination of organic kale leaf, organic brussel sprouts and organic wheat grass powder ensures a wide variety of different vitamins, minerals, and nutrients. All are powerful antioxidants, anti-inflammatory and full of vitamins and minerals including Vitamin A, B, C, K vitamins, manganese, calcium, copper, potassium and

magnesium, just to name a few. They all also play a role in aiding in blood sugar regulation, cholesterol levels, weight management and cancer prevention.

A common issue people face when searching out a quality greens product is the extensive list of ingredients and potential allergens. By selecting what we consider the top three beneficial greens ingredients, we have simplified the search process for you. You are getting exactly what you need in order to benefit from a greens supplement, nothing more, nothing less.
